NOT INTENDED FOR CHILDREN

Spacers

These Spacers can be used to space your projects by size.

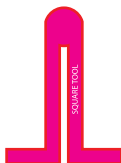

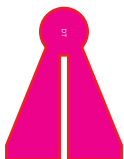

These Spacers can be used to space your projects by 1/8" single or when you stack 2 of them together they will be 1/4" high. They also will double as drying boards.

SPACER

SPACER

SPACER

Square Spacers

These square tools are spacers that allow you to space your projects evenly. They are best used on 1/8" material because you can use the 1/8" middle opening as a guide for your dresser drawers, book shelves, cabinets and lots more.

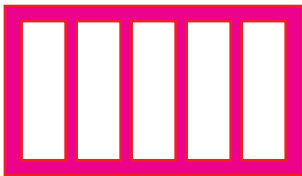

Dresser Tools

This open spacer allows you to space your dresser drawers evenly apart when gluing the drawer faces on.

Open Spacer

Closed Spacer

This closed spacer will help you when building a dresser. Cut your choice material the size of the spacer, trace your drawer openings out of the center rectangles then cut each drawer from your choice material.

These drawer/drying boards will help you when building a dresser. Cut your choice material the size of each board. This will be your drawer faces. These also double as drying boards for your wet painted projects.

Drawer/Drying Boards

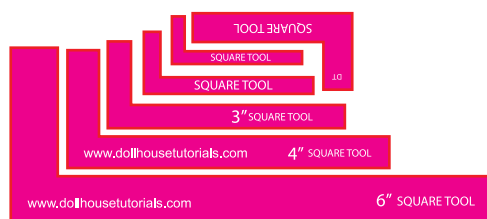

Square/Spacers

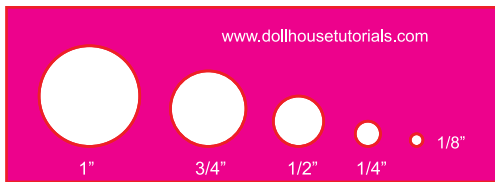

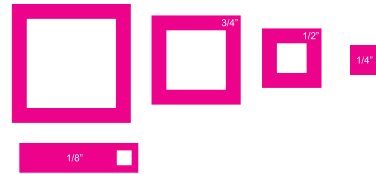

These square/spacer tools can be used to either square up your projects or you can use them to put an even amount of space between your project pieces.

These square tools can be used to square up your projects.

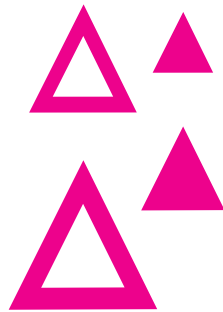

No Guess Dowel Size

These tools can be used to measure your dowels by size.

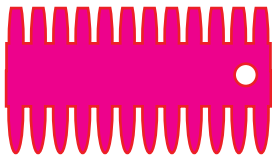

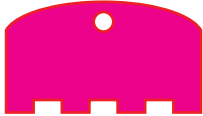

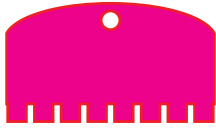

Angle Tools

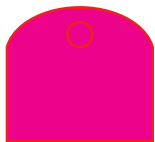

These tools can be used to angle your project.

Wall Tools

These wall tools can be used to spread glue evenly or you can use these tools to spread and texture material like sand, plaster, wood filler and lots more.

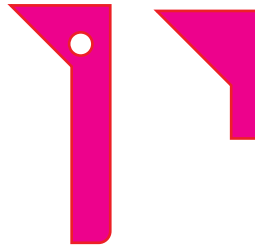

Spreader Tools

These spreader tools can be used to spread your wallpaper flat or they can be used to scrape paper off a wooden wall.

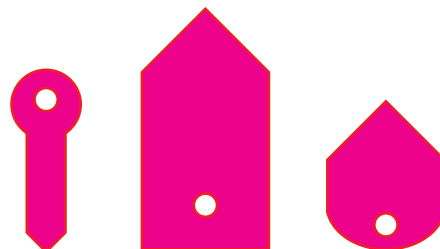

Glue Tools

Remove or smooth
Glue from the corners

Smooth Glue
in the corners

These tools can be used
to remove or spread glue in
or out of the corners of
your projects.

Remove Glue from the corners

Paint Drying Board

This drying board can be placed under the dry side of your wet painted project to keep it elevated. Once elevated you can keep your project raised so it doesn't stick to your table surface.

Siding Ruler

This is mini siding ruler that was designed to help you keep your dollhouse siding even and straight. You mark your lines then glue your siding on each line.
